The screenshot displays the Mimic application's 'Export Cost Parameters' dialog box. The application window has a title bar 'M Mimic' and a menu bar 'File View Tools Help'. The main window shows 'Logged to load2, user dbc' and 'Exporting Cost Parameters'. The dialog box is titled 'Export Cost Parameters' and contains a table with two columns: 'Cost tag' and 'Comment'. The table lists the following parameters: SATY, SATYAM10, LOAD2, MIMIC, SATYAM15, and SATYAM12. Below the table, there are 'Cost Options' with radio buttons for 'Capture From Source' (selected) and 'Capture Current Costs'. There is also a 'Current Cost Parameters' text box containing 'load2' and a 'Comments' text box containing 'On Jan7th'. At the bottom of the dialog are buttons for 'Select All', 'OK', and 'Cancel'. The status bar at the bottom of the application window shows 'Exporting Cost Parameters...', 'Start', 'Debug', 'Doe - ...', 'M Mimic', 'Export...', 'Local...', and '5:45 PM'.
